

## What people are saying about Focus on Information Technology

Several of my students have been offered jobs where they need to use the skills they have learned in the program; this underlines the program's effectiveness."

- Eddie Wong, FIT Teacher

"When FIT came along, we found it was a perfect match ... It gave more structure to what we were already doing. The FIT program expanded on and formalized what was already being taught, and gave the whole new package a title."

- Dennis Joel, BC Educator

"Coming with a FIT background, ITM (information technology management program), was a piece of cake for me." - Ilya Stepanov, FIT Graduate on entering Ryerson University

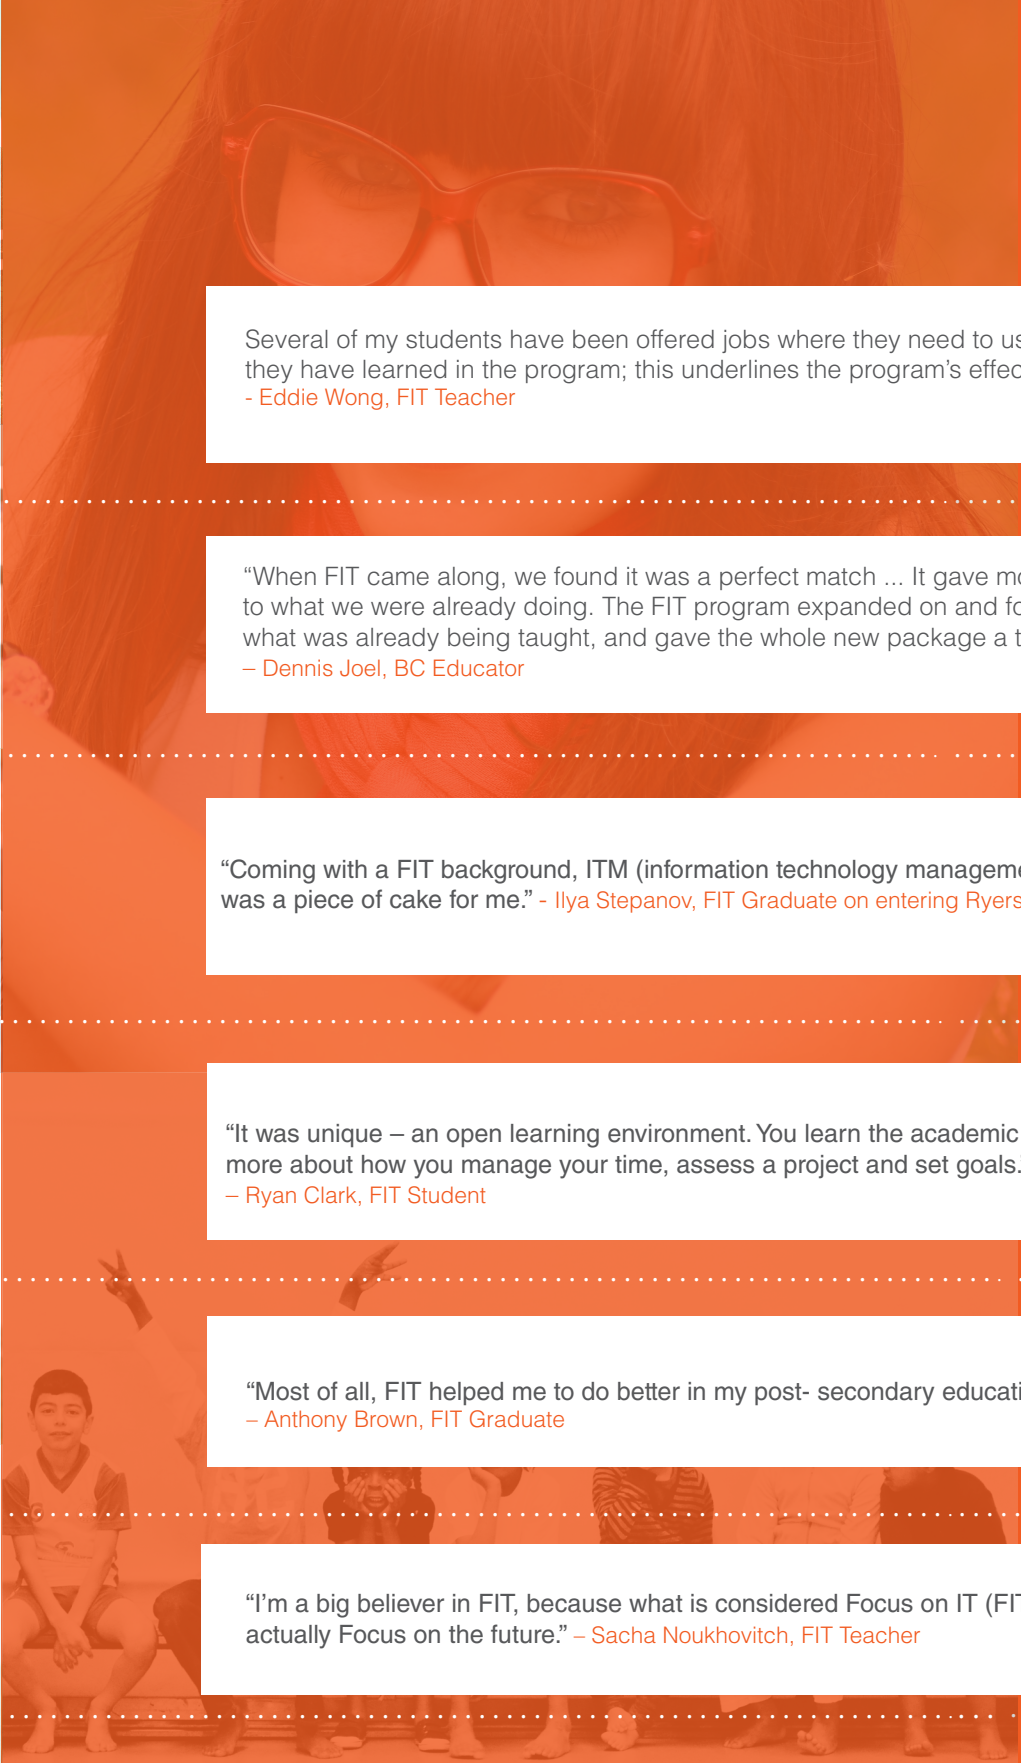

"It was unique – an open learning environment. You learn the academic side, but it's more about how you manage your time, assess a project and set goals."

- Ryan Clark, FIT Student

"Most of all, FIT helped me to do better in my post- secondary education."

- Anthony Brown, FIT Graduate

"I'm a big believer in FIT, because what is considered Focus on IT (FIT), is actually Focus on the future." - Sacha Noukhovitch, FIT Teacher
